RE: PPL Treasure State LLC – 2009 Renewable Energy Standard Annual Report and
Procurement Plan

Dear Ms. Whitney,

As filed in PPL's Renewable Energy Procurement Plan dated June 18, 2008, PPL Treasure State (PPLTS) was a competitive electricity supplier in 2008. Please see the attached spreadsheet that outlines PPLTS' customer information for the compliance year. As required by the code, PPL authorizes NorthWestern Energy to release load data for all PPLTS customers to the Montana Public Service Commission for the purposes of verifying the customer information submitted in this annual report.

MCA 69-3-2004 requires a competitive supplier to procure 5% of its retail sales from eligible renewable resources for each compliance year. The attached report from WREGIS demonstrates our compliance as PPL Energy Plus, LLC, the parent company to PPLTS and the WREGIS account holder for PPL, did procure and retire 4,058 credits through WREGIS on behalf of PPLTS. The credits were acquired from NorthWestern Energy, but generated by the Judith Gap wind project, which makes them eligible credits under the code.

In addition to demonstrating our compliance for the 2008 reporting year, I am submitting this letter to be considered PPLTS' 2009 Renewable Energy Procurement Plan.

The **PPL Treasure State, LLC** plan is as follows:

Do you expect to be a competitive electricity supplier (as defined at §69-3-2003(4), MCA) in 2009? **Yes**

2a. An estimate of your total retail sales for 2009: **87,600,000 kwh**

2b. An estimate of the quantity of renewable energy credits needed to comply with the renewable energy standards in 2009: **4,380**

2c. List the anticipated source(s) of the renewable energy credits. **To Be Determined**

Respectfully submitted,

Rob Gabbard
President
PPL Treasure State, LLC
